MRP : 30,000.00

HQ 800 1 HP
MRP : 38,000.00

TQ 1500 2 HP
MRP : 60,000.00

Operation Conditions

1. Ambient temperature : Max. +40°C
2. Liquid temperature : +4°C ~ +40°C
3. System Pressure : Max. 8.5 kg/cm²
4. Relative humidity : Max. 85% (RH)
5. Under normal operation, it is not necessary to adjust the pressure unless the cut in pressure is higher than preset activation point (refer to specification).

- **Dynamic Appearance** :- Streamlined design, release dynamic charm, with strong dynamic.
- **Ingenious Structure** :- Slough off a piece design, beautiful appearance, small size does not occupy a space.
- **Delayed Start** :- When power on, pump will delay the 3 Sec. to start, in order to protect the motor and personal safety.
- **No water No power** :- No water use 8 minutes after the water pump will automatically power off, after 1 hour will restart to check.
- **Water Stop, Pump Stop** :- No water use, the microcomputer control system can automatically detect and control the motor.
- **Flow Control** :- When the pump outlet is very small, the microcomputer control system will automatically detect and switch to the small flow control system, ensure the pump still normal use, It will not sound pump "popsops" noise, Pressure switch, Truly realize the total head operation.
- **Machine Lock Protection** :- When the pump is not used for a long time, every 72 hours will automatically run 8 Sec. to clear the dirty water, to prevent the pump lock.
- **Overload Protection** :- The motor with thermal overload protection device, prevent the non normal circumstances i.e motor burned.
